Superview Chemical Application

Description: The NGSG for Chemical Applications uses a transparent FEP tube which is either flared and formed over the flange connections to provide a fully lined glass free sight glass for demanding chemical applications or swaged securely into stainless steel end connections. This non glass construction gives a rugged shatterproof sight glass for use in chemical plants.

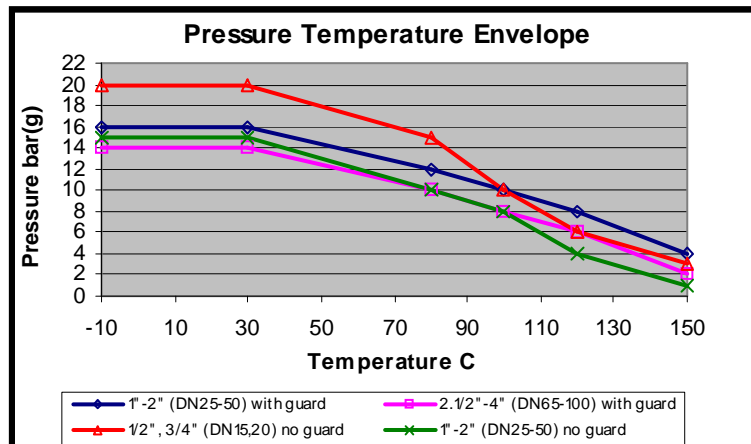

Note : *Indicative length only. Exact minimum and maximum dimensions depend upon the end fittings used.

Approvals: FDA

Features:

- Shatterproof sight tube for maximum safety and suitable for pharmaceutical applications where glass is not allowed
- All wetted parts made from FDA approved FEP—when fully lined specified
- Length to suit customer requirements
- Size up to DN100, DIN or ASME specification available

Dimensions				Mesh Guard		Non Guard or Slotted Guard	
NB inches	DN mm	Id mm	Standard Wall Thickness	Dim. A	Dim. A	Dim. A Minimum Length*	Dim. A Maximum Length*
1/2	15	12.7	2.5	-	-	100	6000
3/4	20	19.1	3.2	-	-	100	6000
1	25	21.7	3.2	100	400	100	6000
1 1/2	40	34.4	3.2	100	400	100	6000
2	50	47.1	3.2	100	400	100	6000
2 1/2	65	58.8	3.2	100	400	-	-
3	80	72.5	3.2	100	400	-	-
4	100	97.9	3.2	100	400	-	-

Options: 1) End fittings—Hygienic end connections RJT, IDF/ISS, DIN, SMS, Tri-clamp etc. 2) Elbows—fixed to rotating. 3) Fittings Materials—Hastelloy C22, C276. 4) Guarding—None, mesh or slotted stainless steel, 5) Sight Tube—Heavy wall 6) Application—Can be engineered into flexible hose assemblies
