Washdown

Washdown Stations and Equipment

Description: A comprehensive range of turn-key packages for washdown stations, or all of the elements provided individually—steam and hot water mixing valves, hose reels and mounting systems, hoses, lances, couplings and valves.

Applications: There are 3 main types of hose reels available, manual, spring retractable, motor driven

Features:

- Reduces the risk of accidents
- Reduces general wear and tear of the hose
- Space saving

Complete Solutions

FlexRite Chemgiene have provided complete washdown systems for over 15 years. The advantage of a turn-key package with ourselves is that all the elements will be combined in thoughtful manner to provide a satisfactory working system.

Selection of the hose reel is only one element of the set-up selection can ruin what otherwise would be a good installation.

Note:

Hose reels now available compliant with the potentially explosive atmospheres (ATEX) directive 94/9/EC

Features:

- Front trigger as standard
- Rear trigger available
- Also available with knuckle guard

Washdown Guns

A comprehensive range of washdown guns is available with a variety of material options including gunmetal, stainless steel and plastic. Front and rear triggers, swivel and quick release couplings are available all fitted with the 9000 series hygienic coupling where required.
